# Alya Zahra Salsabila

**Web Developer | Software Engineer**

Madiun, Indonesia | +62 85927457129 | alyazahrasalsabila03@gmail.com | linkedin.com/in/alyazahrasalsabila | github.com/alyazahs

## SUMMARY

Information Technology graduate from Politeknik Negeri Madiun with 6 months of internship experience as a Programmer at PT Marstech Global. Experienced in building and developing web applications on both the frontend and backend, with hands-on experience in hospital management systems, digital queue systems, authentication, database management, and real-time features. Familiar with JavaScript, React, Next.js, PHP, Laravel, Node.js, Express.js, Python, Flask, and MySQL. Currently seeking an opportunity to grow as a Web Developer or Software Engineer.

## TECHNICAL SKILLS

**Programming & Web:** JavaScript, PHP, Python, HTML, CSS

**Frameworks & Libraries:** React, Next.js, Laravel, Node.js, Express.js, Flask

**Database:** MySQL, SQLite

**Mobile:** Flutter, Kotlin

**Tools & Others:** Git, GitHub, REST API, Vite, Socket.IO, MinIO

## EXPERIENCE

**PT Marstech Global** **Jun – Nov 2025**

**Programmer Intern**

- Contributed to full-stack development of a Hospital Management System.
- Built and improved features for patient registration, reservations, queue management, visit and treatment history, outpatient and inpatient services, dashboards, pharmacy, and user management.
- Worked with CRUD operations, filtering, searching, sorting, database relationships, authentication, and role-based access control.
- Developed and connected frontend and backend features using Next.js, React, Express.js, and MySQL.
- Added real-time queue updates using Socket.IO and supported reporting features with PDF and Excel export.
- Used MinIO to manage files and documents, including user profiles, medical staff information, and outpatient records.
- Also contributed to the hospital's mobile application using Flutter, working on modules such as medical records, outpatient and inpatient services, doctor management, calendar, and feedback.
- Used Git and GitHub for version control and collaboration during development.

## PROJECTS

**Digital Queue Management System for Jiwan District** | React, Vite, Python, Flask, SQLite, RFID, Text-to-Speech, SSE

- Developed a digital queue management system to support the digitalization of administrative services.
- Implemented registration using RFID-based electronic ID cards and manual input.
- Developed queue number generation, service management, and real-time queue display features.
- Implemented Text-to-Speech functionality, authentication, role-based access control, searching, filtering, and PDF and Excel report exports.

**Hospital Management System** | Next.js, Express.js, MySQL, REST API, MinIO

- Contributed to the development of a hospital information system during an internship.
- Worked on features including patient registration, reservations, queue management, medical records, visit history, dashboards, and user management.
- Developed and integrated frontend and backend features, including data relationships, authentication, role-based access control, filtering, reporting, and real-time communication.

**Rumah Batik Madura Website** | PHP, Laravel, MySQL

- Developed a Laravel-based website to display company information and product catalogs.
- Used MySQL for application data management.

## EDUCATION

**Politeknik Negeri Madiun** **2023 – 2026**

Diploma in Information Technology

GPA 3.77/4.00

- **Relevant cousework** Web Design and Programming, Database Systems, Object-Oriented Programming, Systems Analysis and Design, Mobile Programming, UI/UX Design.

## CERTIFICATIONS

**Junior Cyber Security** **June 2025**

National Professional Certification Agency (BNSP) — Indonesia

Credential ID: 193105881160-31

**Junior Web Developer** **July 2026**

National Professional Certification Agency (BNSP) — Indonesia
